

The Premium Core Banking Application for the modern African bank

You're not digital till you're digital at the Qore

Join Us www.qore.inc

What is Qore?

Qore is a Digital Core Banking application built in Africa by Africans, for the complete automation of African banking operations in a modern, thoroughly digital way. It specifically addresses all the African banking use cases that are glossed over by the popular global Core Banking Applications.

Build Tomorrow, Today

Qore is cloud native, interactive and event-driven by design. It leverages all the benefits of modern cloud technology including high availability, scalability and efficiency.

Qore and its API digitally reimagines the boundaries of Core Banking Automation

Why Qore?

- With Qore Your bank achieves complete digitization and automation of operations proliferating productivity and profitability with minimal human intervention.
- Qore gets you the best of both worlds- It combines product maturity from 14 years of software fine tuning, with modern interactive cloud-native technology.
- Qore is 100% local content. Business process flows are localized; support is seamless and customizations (where required) are instant.
- Qore guarantees true executive efficacy empowering executives with business intelligence dashboards for insightful and astute decisioning.
- We guarantee that the Time-to-Market for the launch of your next product or collaboration on Qore is incredibly minimal.

Core Value Proposition

Improved business profitability and competitiveness through adoption of modern cloud technology for banking.

Improved public perception of the organization as modern, technology-oriented, innovative and thoroughly digital.

Enhanced organizational resilience in the wake of industry and macroeconomic challenges like Naira devaluation, local workforce depletion and cyber fraud amongst others.

Benefits

Complete digitization of banking operations including data entry, customer acquisition, product setup and management, branch operations, financial accounting etc.

Improved executive efficiency from secure mobile-application-based workflows

Astute executive decisioning from insightful data-mined Business Intelligence (BI) dashboards

Improved service uptime and availability with remarkably better scalability

Ease of participation in the emerging era of modern Financial Services delivery (aka Fintech 2.0)

Why Qore is more Secure and available than your current Core Banking Application
